(1) Calendar year. Baseline is current policy. Proposal limits the tax benefit of a) itemized deductions, b) tax-exempt health insurance premiums, and c) tax-exempt bond interest to 2 percent of AGI. Effective marginal tax rates are weighted by the appropriate income source. For a description of TPC's current law and current policy baselines, see <http://taxpolicycenter.org/numbers/displayatab.cfm?Docid=3131>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2012 dollars): 20% \$20,113; 40% \$39,790; 60% \$64,484; 80% \$108,266; 90% \$143,373; 95% \$204,296; 99% \$506,210; 99.9% \$2,655,675.
