Number of AMT Taxpayers (millions). Baseline: 4.6
Proposal: 5.2

* Less than 0.05
** Insufficient data
(1) Calendar year. Baseline is current law. Proposal shows the effect of indexing all tax parameters by the chained CPI between 2014 and 2030, evaluated at 2020 income levels. It therefore shows the effect of having indexed the tax system using the chained CPI for the previous 16 years. We assume the annual growth rate of the chained CPI is 0.25 percentage points lower than the CPI-U growth rate. For a description of TPC's current law baseline, see
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.

Effect of Using Chained CPI to Index Tax Parameters Between 2014 and 2030, Evaluated at 2020 Income Levels Distribution of Federal Tax Change by Cash Income Level, $2020{ }^{1}$

Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0412-8).
(1) Calendar year. Baseline is current law. Proposal shows the effect of indexing all tax parameters by the chained CPI between 2014 and 2030, evaluated at 2020 income levels. It therefore shows the effect of having indexed the tax system using the chained CPI for the previous 16 years. We assume the annual growth rate of the chained CPI is 0.25 percentage points lower than the CPI-U growth rate. For a description TPC's current law baseline, see
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
