Number of AMT Taxpayers (millions). Baseline: 4.5 Proposal: 4.2

* Less than 0.05

(1) Calendar year. Baseline is current law. Proposal would repeal the preferential rates on long-term capital gains and qualified dividends and the portion of the 3.8 percent net investment surtax that applies to long-term capital gains and qualified dividends only (the portion of the surtax that applies to other forms of net investment income would be retained). For a description of TPC's current law baseline, see <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2013 dollars): 20% \$24,844; 40% \$48,286; 60% \$82,182; 80% \$137,646; 90% \$188,942; 95% \$271,750; 99% \$641,453; 99.9% \$3,329,195.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

* Less than 0.05

Note: Tax units with children are those claiming an exemption for children at home or away from home.

(1) Calendar year. Baseline is current law. Proposal would repeal the preferential rates on long-term capital gains and qualified dividends and the portion of the 3.8 percent net investment surtax that applies to long-term capital gains and qualified dividends only (the portion of the surtax that applies to other forms of net investment income would be retained). For a description of TPC's current law baseline, see <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2013 dollars): 20% \$24,844; 40% \$48,286; 60% \$82,182; 80% \$137,646; 90% \$188,942; 95% \$271,750; 99% \$641,453; 99.9% \$3,329,195.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.
