Number of AMT Taxpayers (millions). Baseline: 4.5

Proposal: 0

* Less than 0.05

** Insufficient data

(1) Baseline is current law. Proposal would: implement two-rate structure of 15 percent on taxable income up to \$87,850 (\$175,700 for married couples filing a joint return) and 35 percent on taxable income above that threshold; threshold would be indexed for inflation after 2013; repeal head of household filing status; repeal individual and corporate AMT; repeal standard deduction and all itemized deductions other than those for home mortgage interest and charitable contributions; restrict mortgage interest deduction to interest on first \$300,000 (unindexed) of acquisition debt; repeal personal exemption for the primary taxpayer and spouse; repeal ACA surtaxes of 0.9 percent on wages and 3.8 percent on net investment income; implement a personal credit of \$2,000 for singles (\$4,000 for married couples filing a joint return), indexed for inflation after 2013; implement an additional child tax credit of \$2,500 per child, which could offset individual income tax liability plus any Social Security and Medicare taxes in excess of the earned income tax credit; the \$2,500 per child amount would be indexed for inflation after 2013 and the credit would not phase out at higher incomes. Proposal would be effective 01/01/14. For a description of TPC's current law baseline, see:

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The breaks are (in 2013 dollars): 20% \$24,844; 40% \$48,286; 60% \$82,182; 80% \$137,646; 90% \$188,942; 95% \$271,750; 99% \$641,453; 99.9% \$3,329,195.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

Number of AMT Taxpayers (millions). Baseline: 4.5

Proposal: 0

* Less than 0.05

(1) Baseline is current law. Proposal would: implement two-rate structure of 15 percent on taxable income up to \$87,850 (\$175,700 for married couples filing a joint return) and 35 percent on taxable income above that threshold; threshold would be indexed for inflation after 2013; repeal head of household filing status; repeal individual and corporate AMT; repeal standard deduction and all itemized deductions other than those for home mortgage interest and charitable contributions; restrict mortgage interest deduction to interest on first \$300,000 (unindexed) of acquisition debt; repeal personal exemption for the primary taxpayer and spouse; repeal ACA surtaxes of 0.9 percent on wages and 3.8 percent on net investment income; implement a personal credit of \$2,000 for singles (\$4,000 for married couples filing a joint return), indexed for inflation after 2013; implement an additional child tax credit of \$2,500 per child, which could offset individual income tax liability plus any Social Security and Medicare taxes in excess of the earned income tax credit; the \$2,500 per child amount would be indexed for inflation after 2013 and the credit would not phase out at higher incomes. Proposal would be effective 01/01/14. For a description of TPC's current law baseline, see: <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): 20% \$17,272; 40% \$31,839; 60% \$52,010; 80% \$82,156; 90% \$114,173; 95% \$160,278; 99% \$378,492; 99.9% \$2,000,458.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): 20% \$17,272; 40% \$31,839; 60% \$52,010; 80% \$82,156; 90% \$114,173; 95% \$160,278; 99% \$378,492; 99.9% \$2,000,458.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

* Less than 0.05

(1) Baseline is current law. Proposal would: implement two-rate structure of 15 percent on taxable income up to \$87,850 (\$175,700 for married couples filing a joint return) and 35 percent on taxable income above that threshold; threshold would be indexed for inflation after 2013; repeal head of household filing status; repeal individual and corporate AMT; repeal standard deduction and all itemized deductions other than those for home mortgage interest and charitable contributions; restrict mortgage interest deduction to interest on first \$300,000 (unindexed) of acquisition debt; repeal personal exemption for the primary taxpayer and spouse; repeal ACA surtaxes of 0.9 percent on wages and 3.8 percent on net investment income; implement a personal credit of \$2,000 for singles (\$4,000 for married couples filing a joint return), indexed for inflation after 2013; implement an additional child tax credit of \$2,500 per child, which could offset individual income tax liability plus any Social Security and Medicare taxes in excess of the earned income tax credit; the \$2,500 per child amount would be indexed for inflation after 2013 and the credit would not phase out at higher incomes. Proposal would be effective 01/01/14. For a description of TPC's current law baseline, see: <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/Income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): 20% \$17,272; 40% \$31,839; 60% \$52,010; 80% \$82,156; 90% \$114,173; 95% \$160,278; 99% \$378,492; 99.9% \$2,000,458.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

* Less than 0.05

Note: Elderly tax units are those with either head or spouse (if filing jointly) age 65 or older.

(1) Baseline is current law. Proposal would: implement two-rate structure of 15 percent on taxable income up to \$87,850 (\$175,700 for married couples filing a joint return) and 35 percent on taxable income above that threshold; threshold would be indexed for inflation after 2013; repeal head of household filing status; repeal individual and corporate AMT; repeal standard deduction and all itemized deductions other than those for home mortgage interest and charitable contributions; restrict mortgage interest deduction to interest on first \$300,000 (unindexed) of acquisition debt; repeal personal exemption for the primary taxpayer and spouse; repeal ACA surtaxes of 0.9 percent on wages and 3.8 percent on net investment income; implement a personal credit of \$2,000 for singles (\$4,000 for married couples filing a joint return), indexed for inflation after 2013; implement an additional child tax credit of \$2,500 per child, which could offset individual income tax liability plus any Social Security and Medicare taxes in excess of the earned income tax credit; the \$2,500 per child amount would be indexed for inflation after 2013 and the credit would not phase out at higher incomes. Proposal would be effective 01/01/14. For a description of TPC's current law baseline, see: <http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): 20% \$17,272; 40% \$31,839; 60% \$52,010; 80% \$82,156; 90% \$114,173; 95% \$160,278; 99% \$378,492; 99.9% \$2,000,458.

(4) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.
