## Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0613-3).

Number of AMT Taxpayers (millions). Baseline: $4.5 \quad$ Proposal: 4.5

* Less than 0.05
** Insufficient data
(1) Baseline is current law. Proposal would allow an above-the-line deduction equal to 20 percent of the lesser of $\$ 60,000$ or the earned income of the spouse with the lower amount of earned income in the taxable year. The deduction would only be available to married taxpayers filing jointly with at least one qualifying child under the age of 12 . The deduction would phase out for taxpayers with AGI in excess of $\$ 110,000$ over a $\$ 20,000$ range. The phase-out of the earned income tax credit (EITC) would also be calculated based on earned income less the amount of the above-the-line deduction. For a description of TPC's current law baseline, see:
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm

$20 \%$ \$24, $844 ; 40 \%$ \$48,286; $60 \%$ \$82,182; $80 \%$ \$137,646; $90 \%$ \$188,937; 95\% \$271,750; $99 \%$ \$638,232; 99.9\% \$3,279,269.
(4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

Number of AMT Taxpayers (millions). Baseline: 4.5
Number of AMT Taxpayers (millions). Baseline: 4.5
Less than 0.05
(1) Baseline is current law. Proposal would allow an above-the-line deduction equal to 20 percent of the lesser of $\$ 60,000$ or the earned income of the spouse with the lower amount
of earned income in the taxable year. The deduction would only be available to married taxpayers filing jointly with at least one qualifying child under the age of 12 . The
deduction would phase out for taxpayers with AGI in excess of $\$ 110,000$ over a $\$ 20,000$ range. The phase-out of the earned income tax credit (EITC) would also be calculated based on earned income less the amount of the above-the-line deduction. For a description of TPC's current law baseline, see:
Ittp://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are ncluded in the totals. For a description of expanded cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): $20 \% \$ 17,272 ; 40 \% ~ \$ 31,839 ; 60 \% \$ 52,010 ; 80 \% \$ 82,156 ; 90 \% \$ 114,150$ $5 \%$ \$160,278; 99\% \$376,776; 99.9\% \$1,971,618.
4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value
5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

(1) Baseline is current law. Proposal would allow an above-the-line deduction equal to 20 percent of the lesser of $\$ 60,000$ or the earned income of the spouse with the lower amount of earned income in the taxable year. The deduction would only be available to married taxpayers filing jointly with at least one qualifying child under the age of 12 . The
deduction would phase out for taxpayers with AGI in excess of $\$ 110,000$ over a $\$ 20,000$ range. The phase-out of the earned income tax credit (EITC) would also be calculated based on earned income less the amount of the above-the-line deduction. For
http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm
(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see
http://www.taxpolicycenter.org/TaxModel/income.cfm
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): 20\% $\$ 17,272 ; 40 \% ~ \$ 31,839 ; 60 \% ~ \$ 52,010 ; 80 \% ~ \$ 82,156 ; 90 \% ~ \$ 114,150 ; 95 \%$ \$160,278; 99\% \$376,776; 99.9\% \$1,971,618.
(4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value.
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

Baseline is current law. Proposal would allow an above-the-line deduction equal to 20 percent of the lesser of $\$ 60,000$ or the earned income of the spouse with the lower amount
of earned income in the taxable year. The deduction would only be available to married taxpayers filing jointly with at least one qualifying child under the age of 12 . The
deduction would phase out for taxpayers with AGl in excess of $\$ 110,000$ over a $\$ 20,000$ range. The phase-out of the earned income tax credit (EITC) would also be calculated based on arned income less the amount of the above-the-line deduction. For a description of TPC's current law baseline, see:
(2) Includes both filing and non-filing units but excludes those that
these that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are cluded in the totals. For a description of expanded cash income, see
(3) The income percentile classes used in this table are based on the income distribution for the entire population and contain an equal number of people, not tax units. The incomes used are adjusted for family size by dividing by the square root of the number of people in the tax unit. The resulting percentile breaks are (in 2013 dollars): $20 \% \$ 17,272 ; 40 \% \$ 31,839 ; 60 \% \$ 52,010 ; 80 \% ~ \$ 82,156 ; 90 \% \$ 114,150$; $95 \%$ \$160,278; 99\% \$376,776; 99.9\% \$1,971,618.
4) Includes tax units with a change in federal tax burden of $\$ 10$ or more in absolute value
(5) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax
(6) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.
