Number of AMT Taxpayers (millions). Baseline: 4.8

Proposal: 4.8

* Less than 0.05

** Insufficient data

(1) Calendar year. Baseline is current law. Proposal would: (a) raise the top tax rate on long-term capital gains and qualified dividends from 20 percent to 24.2 percent; (b) tax unrealized capital gains at death (table shows the fully-phased in impact of this provision); (c) impose a tax on financial institutions; (d) limit the size of accumulated balances in IRA and 401(k)-type retirement accounts; and (e) repeal the deduction for student loan interest for new borrowers (table shows the fully phased in effect).

Although the education credit provisions provide a net tax increase for some tax units because of the repeal of the Lifetime Learning Credit, they are included in the Tax Decrease Provision Tables, T15-0009 and T15-0010. Estimates in this table are based on descriptions of these proposals provided by the Administration in its fact sheet:

<http://www.whitehouse.gov/the-press-office/2015/01/17/fact-sheet-simpler-fairer-tax-code-responsibly-invests-middle-class-fami>

For a description of TPC's current law baseline, see

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.

* Less than 0.05

(1) Calendar year. Baseline is current law. Proposal would: (a) raise the top tax rate on long-term capital gains and qualified dividends from 20 percent to 24.2 percent; (b) tax unrealized capital gains at death (table shows the fully-phased in impact of this provision); (c) impose a tax on financial institutions; (d) limit the size of accumulated balances in IRA and 401(k)-type retirement accounts; and (e) repeal the deduction for student loan interest for new borrowers (table shows the fully phased in effect).

Although the education credit provisions provide a net tax increase for some tax units because of the repeal of the Lifetime Learning Credit, they are included in the Tax Decrease Provisions tables, T15-0009 and T15-0010. Estimates in this table are based on descriptions of these proposals provided by the Administration in its fact sheet:

<http://www.whitehouse.gov/the-press-office/2015/01/17/fact-sheet-simpler-fairer-tax-code-responsibly-invests-middle-class-fami>

For a description of TPC's current law baseline, see

<http://www.taxpolicycenter.org/taxtopics/Baseline-Definitions.cfm>

(2) Includes both filing and non-filing units but excludes those that are dependents of other tax units. Tax units with negative adjusted gross income are excluded from their respective income class but are included in the totals. For a description of expanded cash income, see

<http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes tax units with a change in federal tax burden of \$10 or more in absolute value.

(4) After-tax income is expanded cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average expanded cash income.
