Source: Urban-Brookings Tax Policy Center Microsimulation Model (version 0305-3A).

(1) Calendar year. Baseline is current law plus the extension of the lower rates on capital gains and qualifying dividends enacted by JGTRRA. Provisions include: \$5 million effective exemption indexed for inflation after 2010; statutory rate of 15 percent on taxable estate between \$5 million and \$25 million and 30 percent on taxable estate greater than \$25 million; repeal the state death tax credit (and do not allow a deduction for state estate taxes paid); repeal the 5-percent surtax.

(2) Tax units with negative cash income are excluded from the lowest income class but are included in the totals. For a description of cash income, see <http://www.taxpolicycenter.org/TaxModel/income.cfm>

(3) Includes both filing and non-filing units. Tax units that are dependents of other taxpayers are excluded from the analysis.

(4) After-tax income is cash income less: individual income tax net of refundable credits; corporate income tax; payroll taxes (Social Security and Medicare); and estate tax.

(5) Average federal tax (includes individual and corporate income tax, payroll taxes for Social Security and Medicare, and the estate tax) as a percentage of average cash income.
